Work History

I have had two wonderful careers. My previous career was in the music industry for 30 years at the highest level as a Producer/Engineer/Mixer. I am one of very few with lifetime sales of over one billion dollars. I was responsible for budgeting, adhering to the budget and the final sound that was released to the public and had a reputation for being on time and under budget on my projects. I worked with all of the major labels and many of the biggest artists in the world. I retired from music and have spent the last 7 years in Transportation for film/tv.
